

Alstom's history of innovation and invention in Sweden goes back more than 140 years. Since **1891**, we have been a key player on the Swedish railway market. Today, we are the largest railway actor in Sweden with **over 1000 trains delivered**, and several large maintenance contracts. We are also delivering the new **national traffic management system (ERTMS)** for the Swedish Transport Administration. Our unique Global Test and Technology centre for propulsion is located in Västerås, and our global Innovation Centre for Rail Control Solutions in Stockholm.

KEY FIGURES

2200 employees
1000+ trains delivered
18 Local depots
1891 Present in Sweden since
